

Company Profile

M. S.
CONSULTING
SERVICE

Presentation

“**M.S. consulting Service** was created by Mme Hela KANNOU for the purpose of serving the oil & gas services & related industries.

Through, **M.S. consulting Service** has not a very long experience, but relies on the long and solid experience of its team works how has an excellent technical knowledge in the oilfield .

M.S. consulting Services work with selected and proofed partners who have many years of project experience. Our clients benefit from the quality and reliability of our services”

Consultants for the exploration and production industry

*“Our team adds value to your oil and
gas operations – from reservoir till
custody transfer point.”*

*“Customer satisfaction, fairness, trust, the high quality of
our services and striving for continuous improvement
characterize our actions”*

The following principles provide a common foundation across the Group on which our HSEQ and Security policies are built:

- We work according to applicable laws, codes and regulations .
- We comply with approved procedures, rules and instructions.
- We provide our people with all necessary information, instruction and supervision.
- Our people are trained and competent for the tasks they are expected to complete.

- We provide Safe Systems of Work (SSOW) facilitated by efficient planning, robust risk assessment and effective management of change.
- All incidents must be reported and investigated and remedial actions assigned and completed.
- Clear objectives are set and progress is regularly reviewed.
- Documentation is reviewed in accordance with a scheduled programme or after a significant change.

CONSULTING
PETROLEUM SERVICES

Pressure Pumping Services

- Kill well operations
 - Mixing System
(Mixing all kind Of fluid)

- Acidizing Services
- Offshore Stimulation Services

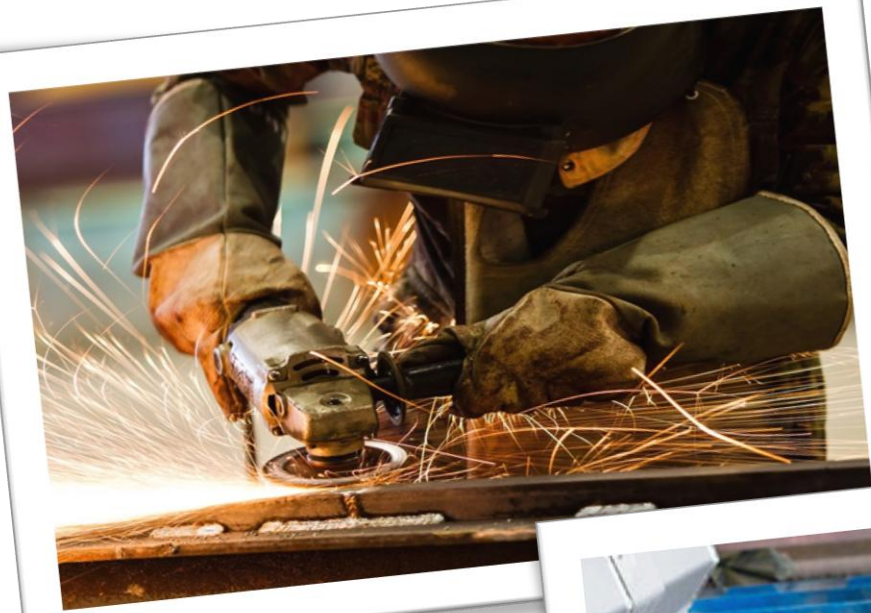

Well Engineering

Our engineering team is ready to solve your subsea well challenges.

We're problem solvers. Whether we're supporting you to explore and develop resources, maintain and maximise existing wells, or prepare for end of life, we work to simplify complex challenges, drive predictability in cost and schedule, and maximise value.

Our well engineering team takes care of time and resource constraints and finds solutions to overcome technical challenges you can't accommodate in-house, so that you can focus on your core expertise.
